

Carbon monoxide (CO)

readme: version 6.5.0

Each file contains data for one day of observation.

File names include the year, the month and the day of observation. Their structure is:

IASI_PLATFORM_L2_CO_YYYYMMDD_ULB-LATMOS_VERSION.nc

where:

PLATFORM = METOPA, METOPB or METOPC, YYYY = year, MM = month, DD = day, VERSION = VX.Y.Z where X.Y is the version number of the retrieval code and Z the version number of the NetCDF file production

The format of the files is NetCDF4.

The structure of the file header (eg for 1st May 2020) is as follows:

```
netcdf IASI_METOPA_L2_CO_20200501_ULB-LATMOS_V6.5.0 {
